Oh. OK.

It was in reference to the Harbor Bridge project in Corpus Christi. The project would replace the existing Harbor Bridge and reconstruct portions of US 181, I-37 and the Crosstown Expressway. The improvements would consist of constructing a six-lane controlled-access facility within a right-of-way width that varies between 200-430 feet, three lanes in each direction with a median barrier, shoulders and a bicycle and pedestrian shared-use path on the main span of the bridge and approaches.

I looked at it from an emission's reduction standpoint and found that the area was in attainment.

You can find the ROD at <https://ccharborbridgeproject.files.wordpress.com/2012/02/us-181-harbor-bridge-record-of-decision1.pdf>.

I thought you mentioned a NEPA issue?

Hi Gloria,

Can you give me a quick summary of the transportation issue?

Thanks, Joyce.
